

We diagnose and treat complex diseases and cancers of the gastrointestinal (GI) tract that require specialized medical expertise and technically advanced tools previously unavailable locally. Our Center has the largest concentration of highly trained endoscopists providing leading-edge care on Long Island to meet the community's growing need.

**Who we serve**

- Patients with gastrointestinal conditions who require specialized medical expertise and technically advanced tools previously unavailable locally

**What we do**

- Diagnose and treat complex diseases and cancers of the gastrointestinal (GI) tract
- Continuously meet the growing demand for this expertise by offering the highest concentration of highly trained endoscopists on Long Island
- Work with a multidisciplinary team that includes expert biliary and pancreatic surgeons and interventional radiologists
- Provide both the referring physician and patient with timely communication every step of the way

**Our program**

Led by Basil Rigas, MD, DSc, Professor and Chief, Division of Gastroenterology and Hepatology, our highly specialized physicians provide expert care in all aspects of gastroenterology, including cancer screening, motility, women's gastrointestinal health, inflammatory bowel disease (IBD), advanced endoscopic interventions, nutrition and weight loss, and liver, pancreatic and biliary diseases. The Division has been designated a "Recognized Endoscopy Unit" by the American Society for Gastrointestinal Endoscopy (ASGE) in recognition of excellence in quality and patient safety.

**Our specialties include**

- Complex biliary diseases
- Pancreatic disorders
- Cystic neoplasms
- Chronic pancreatitis
- Barrett's esophagus
- Endoscopic oncology
- Esophageal cancer
- Gastric cancer
- Pancreatic cancer
- Rectal cancer
- Small bowel disorders
- Recurrent GI bleeding

***U.S. News & World Report's  
2010-11 "Best Hospitals" issue  
ranks Stony Brook Gastroenterology  
among the Top 50 in America.***
