University Associates in Obstetrics & Gynecology

## University Associates in Obstetrics & Gynecology

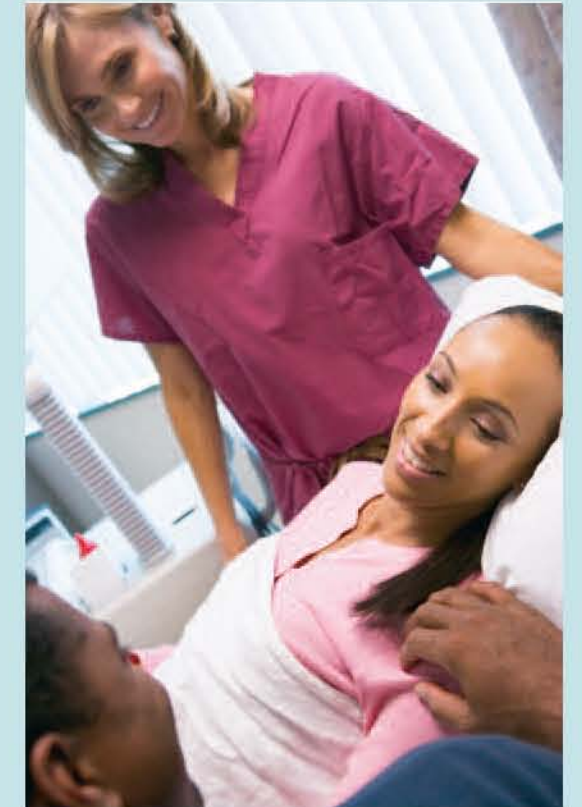

### Healthcare for Females from Adolescence Through Maturity

## Welcome to University Associates in Obstetrics & Gynecology

University Associates in Obstetrics and Gynecology is the faculty practice associated with Stony Brook University Medical Center which includes the only tertiary hospital in Suffolk County. We have American Board Certified physicians in High Risk Obstetrics, Infertility, General Obstetrics and Gynecology, Oncology as well as Fellowship Trained Urogynecologists. We also have the largest Midwifery practice in Suffolk County who are certified by the American College of Nurse Midwives.

## Our Services

The services of University Associates in Obstetrics and Gynecology for female patients from adolescence through maturity include:

**General Gynecology**; cancer screening, management of abnormal Pap smears, family planning and surgical management of fibroids, endometriosis, and other benign gynecologic conditions as well as minimally invasive surgery including robotic-assisted surgery for many conditions.

**General Obstetrics**; pregnancy screening, prenatal care, labor and delivery management, and postpartum care. Other professionals are integrated into our practice of obstetrics including genetic counseling, nutritionists, social workers, childbirth educators and lactation/breastfeeding specialists.

**Gynecologic Infectious Diseases**; treatment and prevention of sexually transmitted infections and consultations in obstetric and gynecological infections.

**Gynecologic Oncology**; care for women with cancers of the ovary, uterus, cervix, vulva and vagina. *Member of the Gynecology Oncology Group (GOG)!*

**High-risk Obstetrics**; advanced techniques in prenatal diagnosis, as well as consultations to assist in the management of complicated pregnancies. Our ultrasound unit has been recognized for its expertise in ultrasound assessments of fetal anatomy utilizing the latest technology including 4D (four dimensional) imaging. Antepartum tests, including amniocentesis, chorionic villus sampling and fetal blood sampling are all routinely performed.

**Reproductive endocrinology and infertility**; infertility diagnosis and treatment of females, fertility medications, intrauterine insemination, in vitro fertilization, intracytoplasmic sperm injections and ovum donation.

**Urogynecology and Reconstructive Pelvic Surgery**; diagnosis and treatment of lower urinary tract disorders, incontinence, and pelvic organ prolapse.

**The Midwifery Practice at Stony Brook** is a full scope midwifery practice caring for women through their life cycle from puberty on through menopause. We believe that there are natural rhythms within a woman's life, which include sexuality, pregnancy, childbearing and menopause. Each is an important event with the life of a woman and her family. We spend time with women... listening and learning from them in the process of educating women about their health choices.

## Guidelines

### Appointments

Please call our offices to schedule, change or cancel an appointment. Our office phone numbers are listed in the "Our Offices" section of this brochure. Evening hours are available by appointment only.

### Fees & Insurance

Our practice accepts most insurance plans. Please have your insurance information available when making an appointment to ensure that your care is covered. For up-to-date insurance information, please visit [www.stonybrookphysicians.com](http://www.stonybrookphysicians.com) and utilize the "Find a Doctor" feature.
